A. Automated surveillance system extension to the river part of the Greek - Turkish borders at Evros territory and interconnection of Regional Integrated Border Management and Migration Centers (I.B.M.M.C.s)

The action contributed to the installation of an automated border surveillance system in the Evros area, using state-of-the-art surveillance equipment at key points along the Greece-Turkiye border.

B. Advanced Passenger Information System - APIS

The action includes the development and establishment of infrastructure and Advanced Passenger Information System (APIS), in accordance with national and European regulations, in order to improve border controls and combat the phenomenon of illegal entry.

C. Training of Hellenic Police personnel in external borders' integrated management

The Action aims to enhance post-training activities for the staff of the Hellenic Police, who come from Services that are in charge of border control at the external borders and the management of the migration flows, in the framework of their competences.

D. Training of fixed-term Special Guards new recruits

The Action aims at the recruitment and training of two hundred and fifty (250) Fixed-Term Border Guards (S.F.O.X.), for a period of four (4) months. Upon completion of the training, the staff in subject will be deployed to Hellenic Police Border Services at Evros region and will be able to perform tasks that enhance the capacity for more efficient border control and the protection of the external borders.

E. Purchase mobile vehicle scanning units to identify any hidden illegal migrants

The Action aims at the procurement of mobile vehicle scanning units, which will be placed in the Border Control Points (BCPs), allowing the identification of any clandestine in specially designed crypts and in all types of vehicle.

F. Purchase of vehicles for Hellenic Police

The Action aims to increase the operational readiness of the Services in charge of the control of the external borders and the management of migratory flows, with the supply of vehicles of various types.

G. Purchase of mobile heart beat detector devices and purchase of CCTV camera systems

The Action aims at the procurement of portable heart beat detectors systems, which will be used by the police personnel, in order to achieve the detection of any person
