

Special Violent Crimes Division completed the Action/Project "Supply of electronic equipment for the needs of the Greek Police", with MIS code "5053771" through the National Program of the European "Internal Security Fund" for the programming period 2014-2020.

The scope of the action concerned the procurement of:

- a) one (1) SCANNER for space three-dimensional imaging, that contributes significantly to the ongoing investigations, as it produces a three-dimensional capture of the scene, quickly and in absolute detail, keeping the condition of the scene in question unchanged in a digital format, capturing all possible clues and evidence.
- b) seventy-five (75) PCs with increased computing capabilities that enable optimal utilization of the data analysis and processing software used.
